Jason Morrison

SENIOR VOIP ENGINEER | SIP & CARRIER VOICE PLATFORMS

484-432-6210 | jason.voipengineer@gmail.com | linkedin.com/in/jason-morrison-2435aa44/ | Downingtown, PA

PROFESSIONAL SUMMARY

Senior VoIP Engineer and technical lead with 15+ years of experience designing and operating carrier-grade and enterprise voice platforms. Experienced in SIP/RTP troubleshooting, carrier interconnects, SBCs, and OpenSIPS configuration. Leads production upgrades and cross-functional engineering work across cloud, hybrid, and on-prem environments. Builds Python/Ansible automation and supports containerized voice workloads.

CORE COMPETENCIES

SIP/RTP troubleshooting | Carrier interconnects | SBCs & softswitches | OpenSIPS configuration | Call quality analysis | Technical leadership | Python & Ansible | Cloud voice platforms

WORK EXPERIENCE

MetTel — Sep 2024 - Present

Senior VOIP Engineer

New Jersey

- Design, integrate, and troubleshoot SIP trunking, carrier interconnects, SBCs, BroadWorks, and Microsoft Teams voice services, including Direct Routing and Operator Connect.
- Serve as a senior escalation point for complex SIP/RTP, call-routing, media, interoperability, and call-quality issues using Wireshark, packet captures, SBC/platform traces, and end-to-end call analysis.
- Act as a senior technical lead for carrier-grade voice platform architecture, upgrades, technology evaluations, and operational improvements across highly available production environments.
- Lead platform and OS upgrade initiatives, interoperability testing, implementation planning, and production validation while minimizing service impact.
- Partner with network engineering, security, vendors, carriers, and internal stakeholders to improve platform resiliency, security, monitoring, standards, and operational readiness.

Evolve IP — Jan 2015 - Aug 2024

Senior VOIP Engineer

Pennsylvania

- Designed and scaled VoIP services across distributed, cloud-based environments.
- Served as escalation point (Tier 4) for complex call quality and interoperability issues.
- Performed deep-dive troubleshooting using Wireshark, SIP traces, and RTP analysis to resolve critical issues.
- Developed automation tools (Python/Ansible) to streamline provisioning and reduce operational overhead.
- Helped drive the shift toward containerized voice workloads using Docker and Kubernetes.
- Led integrations with Microsoft Teams Direct Routing and Webex, expanding platform capabilities for enterprise customers.
- Built and supported WebRTC-based communication workflows, bridging browser/mobile clients with SIP infrastructure.
- Worked closely with product and engineering teams to translate technical capabilities into customer-facing solutions.

Flow

Aug 2010 - Feb 2014

Switch Engineer

Jamaica

- Managed Class 5 softswitch infrastructure and multi-protocol interconnects (SIP, SS7, PRI, CAS).
- Designed and deployed voice services using SBCs and Metaswitch platforms.
- Integrated domestic and international carrier connections.
- Supported product launches and trained internal teams on new voice services.
- Provided high-level support for enterprise and carrier customers.

IslandNet

Jan 2008 - Aug 2010

VOIP Network Engineer

Jamaica

- Built and supported VoIP services using Asterisk and carrier softswitches.
- Established SIP/H.323 interconnections with global carriers.
- Managed underlying network infrastructure supporting voice delivery.
- Optimized routing and cost strategies through LCR and carrier negotiation.

EDUCATION

Bachelor of Science in Electrical, Electronics and Communications Engineering University of Technology Jamaica

Sept 2002 - Jun 2007

CERTIFICATIONS

CCNA (Routing and Switching)

SSCA (SIP School)

Polycom Hosted Voice Services (Level 2)

Audio Codes SIP CEP

CUCM and CUCCX

Certified Kubernetes Administrator (CKA)

SKILLS

Voice & real-time communications: SIP, RTP, RTCP, SRTP, WebRTC, SIP trunking, call routing, media handling, IVR, MOS, jitter, latency, packet loss

VoIP platforms & infrastructure: OpenSIPS configuration, BroadWorks, FreeSWITCH, Asterisk, CUCM, Metaswitch, Oracle/Acme Packet, AudioCodes, Sansay SBCs

Cloud, DevOps & automation: Kubernetes, Docker, microservices, Python, Ansible, CI/CD concepts, cloud-native architectures

Networking & operating environments: TCP/IP, DNS, NAT, firewalls, QoS, STIR/SHAKEN, encrypted signaling and media, SIP/SS7/PRI/CAS carrier interconnects, Linux/Unix, private/public/hybrid cloud

Monitoring & troubleshooting: Wireshark, PCAP analysis, SIP traces, RTP analysis, CDRs, Grafana, Elasticsearch/Kibana, Splunk
